Manual pager utils

Manual page utils

Manual page utils

Manual pager and (1) line 1/507 4% (press h for help or q to quitils)
```

man Is

man Is

man man. Z

Display the manual page for the item (program) is.

man man. Z

Display the manual page for macro package man from section Z. (This is an alternative spelling of "man Z man".)

man 'man(Z)'

Display the manual page for macro package man from section Z. (This is another alternative spelling of "man Z man". It may be more convenient when copying and pasting cross-references to manual pages. Note that the parentheses must normally be quoted to protect them from the shell.)

man -a intro

Display, in succession, all of the available intro manual pages contained within the manual. It is possible to quit between successive displays or skip any of them.

man -t bash | lpr -Pps

Format the manual page for bash into the default troff or groff format and pipe it to the printer named ps. The default output for groff is usually PostScript. man --help should advise as to which processor is bound to the -t option.

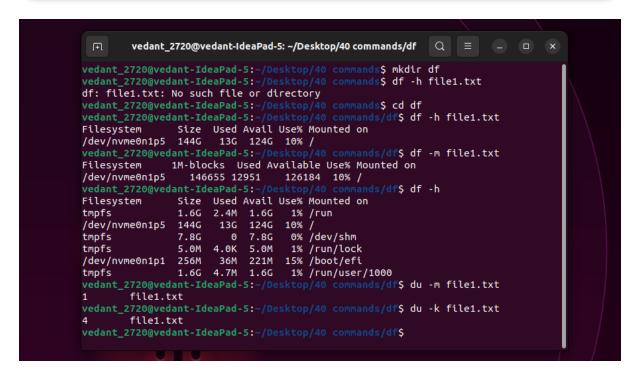

man -l -Tdvi //foo.1x.gr > //foo.1x.dvi

This command will decompress and format the nroff source manual page _/foo.1x.gr into a device independent (dvi) file. The redirection is necessary as the -T flag causes output to be directed to stdout with no pager. The output could be viewed with a program such as Manual page man(1) line 52/507 14% (press h for help or a to quit)
